

IILM UNIVERSITY

C++ Programming
Internship

An Internship Presentation Report

INTERNSHIP DURATION

10 August 2026 – 10 September 2026

STUDENT CREDENTIALS

Abhisar Sharma

Roll No.
25SCS1003000683

Degree
B.Tech (CSE)

HOST ORGANIZATION
CodSoft

Candidate Details

Student Name: ABHISAR SHARMA

Roll Number: 25SCS1003000683

Degree: B.Tech (Computer Science & Engineering)

Academic Batch: 2025-2029

University: IILM University, Greater Noida, U.P.

Internship Profile

Program: C++ Programming Virtual Internship

Organization: CodSoft

Duration: 1 Month

Start: 10 August 2026

End: 10 September 2026

Tasks Completed: 3

About CodSoft

CodSoft provides project-based learning and virtual internship opportunities designed to give learners practical programming experience.

The C++ Programming internship used task-based assignments to encourage practical application of programming concepts.

Internship Context

- C++ programming and problem solving
- Hands-on console application development
- Compilation and testing
- GitHub source-code submission
- Demonstration of completed tasks

The Problem

The internship focused on converting C++ fundamentals into complete working programs.

Each application had to accept user input, process it using appropriate programming logic and display meaningful output.

The Objectives

- Strengthen practical C++ skills
- Develop three working applications
- Apply conditions and loops
- Practice functions, vectors and switch-case
- Compile and test programs
- Organize source code on GitHub

C++

Programming language used for all three internship tasks.

Visual Studio Code

Source-code editing, compilation and execution environment.

GCC / G++

Compiler used to build and test the C++ programs.

GitHub

Repository used to organize and submit the three source files.

Repository:
https://github.com/abhi5ar/CODS_OFT_TASKSNO

01 Requirement

Understand task and input/output.

02 Design

Plan flow and C++ constructs.

03 Implementation

Write source code in VS Code.

04 Compilation

Build and resolve errors.

05 Testing

Run inputs and verify output.

06 Submission

Store code and record demos.

How It Works

The program generates a random number from 1 to 100.

The player repeatedly enters a guess. The program compares the guess with the generated number and gives “too high” or “too low” feedback until the correct answer is found.

C++ Concepts Applied

- `srand()` and `rand()`
- do-while loop
- if-else conditions
- Attempts counter
- Console input/output

How It Works

The user enters two numbers and selects an arithmetic operation.

The program calculates and displays the result for addition, subtraction, multiplication or division.

C++ Concepts Applied

- User input and output
- switch-case statement
- Arithmetic operators
- Division-by-zero validation
- Menu-based interaction

How It Works

The program manages a simple list of tasks through a console menu. Users can add tasks, view their status, mark tasks as completed and remove tasks from the list.

C++ Concepts Applied

- Vector-based task list
- Functions
- Loops for menu interaction
- User input validation
- Task completion and removal
- Task status management

C++ Fundamentals

Applied variables, operators, conditions, loops and I/O.

Vectors & Structures

Used vectors and structures for task storage and status management.

Submission Skills

Organized source code in GitHub.

Problem Solving

Converted task requirements into logical program flows.

Testing

Compiled and tested programs with different inputs.

Practical Exposure

Built three working console applications.

Internship Offer Letter

CodSoft Internship Offer Letter

Candidate: Abhisar Sharma

Roll No.: 25SCS1003000683

Internship: C++ Programming

Offer Letter Date: 08 August 2026

Duration: 10 August 2026 - 10 September 2026

The offer letter confirms the virtual C++ Programming internship with CodSoft for a duration of one month.

Project Submission

GitHub Repository:

https://github.com/abhi5ar/CODSOFT_TASKSNO

Projects:

1. Number Guessing Game
2. Simple Calculator
3. To-Do List

The three project demonstrations were also recorded and posted individually on LinkedIn as part of the internship submission process.

Thank You!

Abhisar Sharma
